The Heart Story

Art is not an ornamental adjunct, art is not a philosophical abstraction, art is not an esoteric percept. Art is one's connection with the surrounding, art is the realization of becoming more sensitive towards existence, art is a feeling towards nature... art is simply an extension of the self.

Man aspires many things in life and nothing satisfies him more than the secure feeling of being connected to nature. In his house, in his workplace, and in the places where he dines or gathers to breathe more joy unto his life, he seeks that connection that gives him a tranquil mind.

Through our designs we simply make sure that our clients feel at home wherever they are. Our products are inspired from nature, which is the greatest creator of all, with its never ending possibilities and unceasing marvel. From a geometric honeycomb to a wind-swept riverbed, from a cloudy leopard skin to a callous mountain ridge, nothing fails to inspire our simple mind.

From a small group of fine art graduates forming Artisticks in 1989, our company has grown wide and deep, flowering all the way. We serve our client with stunning designs translating into quality products with the underlying fabric of integrity. Today with more than a hundred hands-on talented artists and gifted craftsmen, our joy and enthusiasm to cater to the aesthetic demands of our esteemed clients has only grown exponentially. Our designs speak the language you want them to speak. We give a subtle form to your thoughts and percepts; we add some color to your dreams. We are those humble merchants on your memory lane who give your world some sheen. For Art is not mere ornamentation... Art is an extension of Thee. Art complements Thyself.
